OUR SERVICES

Main Street

Connections

We provide cost effective public transportation analysis to the transit professional.

Our goal is to help create a vision of the future of transportation needs within a community, improve mobility, and reduce budgetary needs.

Through strategic transportation planning, we help guide you to a better understanding of the various modal alternatives available.

This includes an assessment of funding sources, partnering possibilities, marketing tools, and engaging local decision makers.

Community goals such as employment related transportation, medical trips, and allowing seniors and individuals with disabilities a sense of freedom of mobility, while lending to economic stability vital to community development.

Promoting community development through Public Transportation.
